

Dear Process Mining Community,

We are happy to announce the new version of LANA - with the advanced notebook-style dashboard that takes your KPI analysis to the next level. Let's work together to deliver continuous improvement!

Your Lana Labs Team

### The LANA Dashboard form now on in notebook-style!

With the new notebook-style Dashboard, you can make your reporting even more flexible and comprehensive. Select from familiar and new diagram types the ones that represent your key figures best. Position the diagrams flexible and customize their design according to your wishes.

## What's new?

### Everything important at one glance

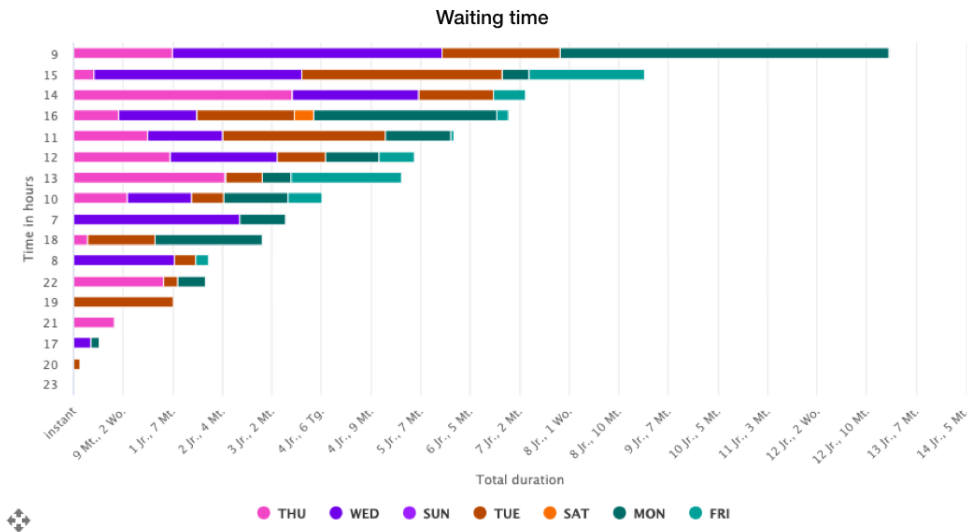

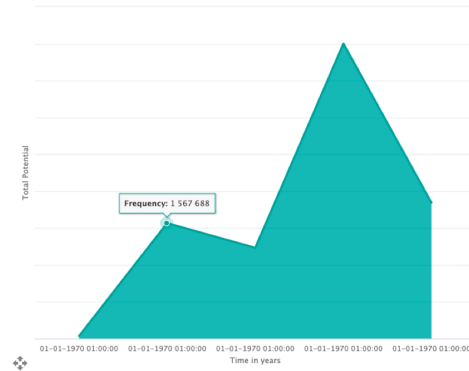

In the new notebook-style dashboard in LANA Process Mining, you can place diagrams according to your needs. **Adjust the size of the diagrams flexible.** **Define meaningful diagram titles.** Edit, delete or add new diagrams directly from the dashboard. Furthermore, the new sidebar allows you to view detailed settings at any time.

## New opportunities through diversity

You can customize how your key figures are displayed graphically. Simply select the diagram type that represents your process mining results best. **Use the new sidebar to change the type or parameters of your diagrams with just one click.**

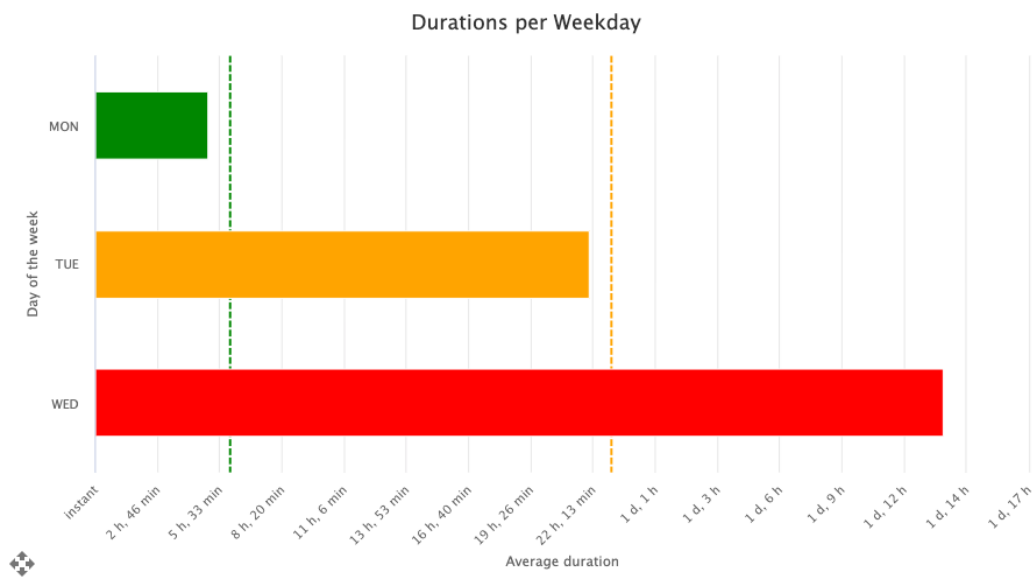

The available diagram types are:

- Bar chart
- Column chart
- Stacked bar chart
- Stacked column chart
- Number / KPI
- Histogram
- Line chart
- Area chart

## Monitoring without limits

**Add thresholds to the diagrams** to see which key figures are within the target range and which exceed the set values. There are no more limits to your effective monitoring.

Are you interested in LANA Process Mining's new dashboard? Would you like to learn about its features and flexibility? Contact us and arrange your demo appointment.

**Arrange a demo session now**
